

Design & build trading workflows... faster!

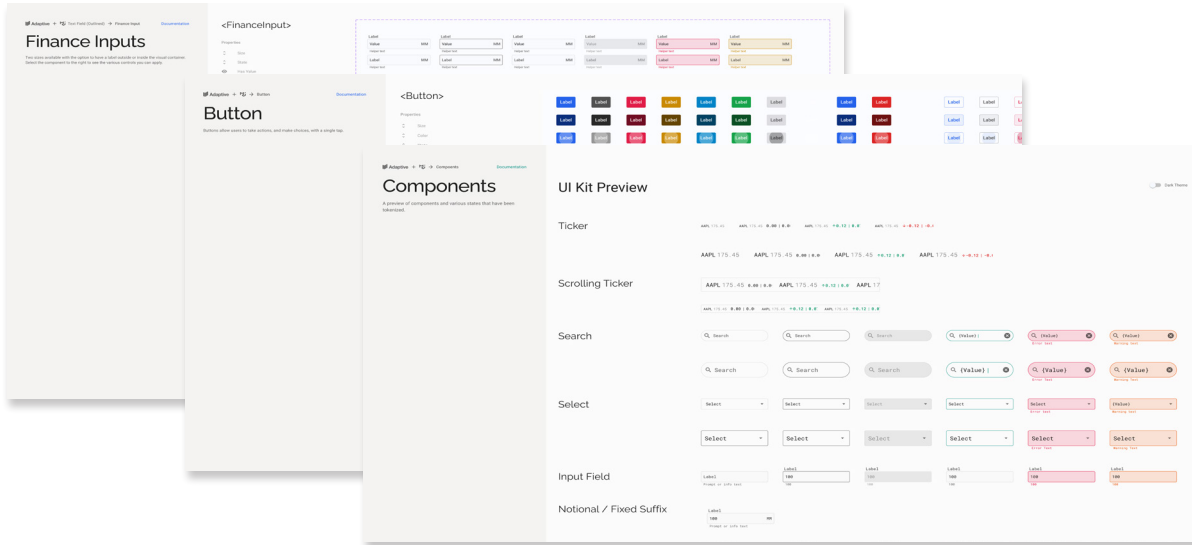

The Adaptive UI Starter Kit is a codified design system that allows Adaptive to expedite the delivery of desktop environments and create consistency across projects. It offers a rich collection of common, user interface (UI) components such as notional entry, date pickers, buy/sell buttons, basic blotter, and more, built specifically for the functionality required by trading platforms.

Leveraging more than a decade of domain expertise, Adaptive has developed dozens of desktop environments for institutions including numerous global tier 1 investment banks.

Starter Kit Features:

- Capital markets specific business logic, out-of-the-box
- Foundational components, illustrations, and graphic elements such as instrument inputs, cell grid, and charts, along with essential page elements such as layout elements, buttons, typography, and more
- Support for thumbing and advanced modifications (margining, padding)
- Fully customisable to your firm's branding, at the click of a button
- Suitable for creating web and mobile apps
- Optimised for responsive design and accessibility
- Open source library integrations, including Material UI
- Inclusive designs complying with accessibility guidelines, such as ADA.
- Highly scalable as a code-based UI system
- Source control integration enables designers to push updates directly to source

The Benefits:

- **Accelerate your design process**
Start with tokenized design assets in Figma, allowing designers to customise design system elements and begin creating unique prototypes
- **Quick start implementation**
Get all foundational components branded out-of-the-box, saving time usually spent laboriously building the same base components over and over again
- **Focus on the business solution**
Concentrate on using valuable time creating the best workflow solution without constraints or limitations
- **Maintain design consistency**
Create consistency across projects by leveraging shared, common, reusable components
- **Increase development efficiency between designer, developer and business users**
Leverage the UI kits designer-to-developer workflow to accelerated feedback loops and release an MVP fast. Edit master components that filter through into every design without having to touch code
- **Stay compliant at all times**
Pick a few linchpin elements and generate a ADA compliant tweakable themes instantly
- **Facilitate the design-to-developer handoff**
Resulting in fewer errors and better encapsulating requirements

Tech Stack:

- Language: **Typescript**
- Client Framework: **React***
- Style Engine: **Emotion***
- Prototyping & Design Tool: **Figma**
- Prototype Tokenization & Display: **Tokens Studio**
- Source control: **Github** (for Source <> FIGMA integration)

Whilst the prescriptive implementation leverages React for the UI layer, the design tokens are consumable in any Typescript or Javascript codebase.

* Integration with other client libraries possible

The UI Starter Kit is available to all clients as part of the Adaptive design engagement.

Adaptive builds and operates bespoke trading technology solutions across asset classes for financial services firms wanting to own their technology stack to differentiate and compete in the long-term. Central to Adaptive’s offering is Aeron, the global standard for high-throughput, low-latency and fault-tolerant trading systems - the open source technology supported and sponsored by Adaptive. Adaptive develops Aeron technology, additionally offering bespoke applications, as well as premium features and expert consultancy to deliver best-in class proprietary trading technology for banks, investment firms and exchanges.
